EMPLOYMENT EXPERIENCE

Freelance Full Stack Developer

August 2026 – Present

Self-Employed / Independent Consultant

Domain: EdTech & Modern Web Platforms

Clients: JavaTechnocrat (Learning Institution)

Projects: JavaTechnocrat Official Web Platform (javatechnocrat.in)

Responsibilities:

- Designed and engineered a fully responsive modern web platform for JavaTechnocrat using React.js, TypeScript, and Tailwind CSS, serving **5,000+ monthly active student visitors**.
- Integrated secure **Razorpay payment gateway** processing online course enrollments and tuition fee collections with automated dynamic invoice/receipt generation.
- Architected production cloud deployment hosted on Vercel with custom DNS routing, SSL certificates, and domain management via GoDaddy, maintaining **99.9% uptime**.

Software Developer (June 2025 – July 2026) [Promoted]

Software Developer Trainee (June 2024 – May 2025)

Mindcys Consultancy Pvt. Ltd.

June 2024 – July 2026 (2 Years Exp)

Domain: Healthcare, Diagnostic Systems & Enterprise SaaS

Clients / Products: Swastyam Healthcare Platform, Diagnostic Lab Ecosystem

Projects: Swastyam (B2C Healthcare Platform), Lab Management System (Diagnostic Ecosystem)

Responsibilities:

- Promoted to Software Developer after Year 1** following proven technical ownership in full-stack architecture, API optimization, and CI/CD pipelines.
- Spearheaded full-stack development for Swastyam B2C platform and Lab Management Ecosystem using React.js, Tailwind CSS, Node.js, and Express.js, serving **10,000+ registered users**.
- Engineered diagnostic workflow handling **300+ daily sample collections** across in-lab visits and home pickups with real-time transit tracking for **15+ field collectors**.
- Built multi-tier RBAC security governing handoffs between Lab Collectors, Lab Assistants processing **1,000+ daily test parameters**, and reviewing doctors.
- Configured automated GitHub Actions CI/CD workflows for automated testing (Jest/Supertest) and zero-downtime deployments, reducing release cycles from **3 days to 4 hours**.
- Designed normalized MariaDB schemas, implemented Redis caching layers, and tuned SQL queries with B-tree indexing to **improve API latency by 45% under 1,000+ concurrent requests**.

Junior Programmer

June 2023 – May 2024

Juvenilia Technology Pvt. Ltd.

Domain: Web Applications, B2B SaaS & Automation

Clients: Corporate Portals, B2B Lead Generation Platforms

Projects: Corporate Web Portal, Email Extractor (B2B Lead Generation SaaS)

Responsibilities:

- Designed and deployed official company portal using React.js, TypeScript, and Tailwind CSS, achieving **95+ Google Lighthouse scores** and 100% responsive cross-device layout.
- Engineered Email Extractor SaaS application using React.js, Node.js, and MariaDB for automated web data scraping, processing **50,000+ lead records daily**.
- Implemented sliding-window rate limiting, bulk deduplication logic, and asynchronous background queues handling batches of **10,000+ records** without system degradation.
- Managed backend hosting on Linux VPS, database query indexing, NGINX reverse proxy, SSL termination, and PM2 cluster management ensuring **99.9% uptime**.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3.

Frameworks: React.js, React Native CLI, Next.js, Node.js, Express.js, Redux, Redux Saga, TanStack Query, Tailwind CSS, shadcn/ui.

Developer Tools: Docker, Docker Compose, AWS (EC2, S3, CloudFront, IAM), Vercel, CI/CD (GitHub Actions), NGINX, Linux Shell (Bash), PM2, Git, Vite.

Libraries: tsup, Vitest, Jest, Supertest, Winston, Sentry, Prisma ORM, Formik, Yup, Zod, Postman.

Databases: MariaDB, PostgreSQL, MySQL, MongoDB, Redis (Cache-Aside).

Expertise: Microservices Architecture, Distributed Systems, RESTful APIs, Event-Driven Architecture (RabbitMQ), WebSockets, RBAC Security, Razorpay, Open-Source npm Publishing.

FEATURED PROJECTS

SWASTYAM — B2C HEALTHCARE PLATFORM

Domain / Platform: Live Production Product • Web, Android, iOS

Links: Play Store: play.google.com/store/apps/details?id=com.swastyam | App Store: apps.apple.com/in/app/swastyam/id6759480939

Responsibilities / Key Deliverables:

- **Core Healthcare Ecosystem:** Engineered a live multi-platform B2C application supporting **10,000+ registered patients**, dynamic doctor slot scheduling, clinic/pharmacy bookings, and secure Razorpay payment gateway integration.
- **Telehealth & Interoperability:** Built low-bandwidth resilient WebRTC video consultations (<256 kbps) and managed HL7/FHIR-aware data structures for seamless lab reports and digital prescription exchanges.
- **Security & Compliance:** Architected secure handling of Protected Health Information (PHI) across **50+ REST endpoints**, fully aligned with India's DPDP Act and ABDM guidelines.

LAB MANAGEMENT SYSTEM — DIAGNOSTIC ECOSYSTEM

Domain / Stack: Healthcare & Diagnostic SaaS • React.js, Tailwind CSS, Node.js, Express.js, MariaDB, WebSockets, RBAC

Responsibilities / Key Deliverables:

- **Sample Collection Workflow:** Developed end-to-end appointment booking for in-lab visits and home pickups, processing **300+ daily sample requests** with automated time-slot allocation.
- **Dedicated Field App:** Built dedicated Lab Collector interface enabling **15+ field agents** to accept collection requests, record barcode IDs, and update transit status in real time.
- **Role-Based Processing:** Engineered multi-tier RBAC workflow where Lab Assistants receive samples, log results across **1,000+ daily test parameters**, and route reports to doctors for sign-off.

EMAIL EXTRACTOR — B2B UTILITY SAAS

Domain / Stack: B2B SaaS & Automation • JavaScript (ES6+), React.js, Node.js, MariaDB, Redis, PM2

Responsibilities / Key Deliverables:

- **Extraction Engine & Lead Processing:** Developed full-stack SaaS for automated lead generation processing **50,000+ records daily** with queue throttling, email deduplication logic, per-account tenant isolation, and bulk CSV export.

PERSONAL PROJECTS

NODE.JS DEVELOPER TOOLKIT — OPEN SOURCE NPM PACKAGE

Tech Stack: TypeScript, Node.js, Express, tsup (ESBuild), Vitest, GitHub Actions (CI/CD)

Links: npm: npmjs.com/package/@abinashswain/node-developer-toolkit | github: github.com/swain-abinash/node-developer-toolkit

Responsibilities / Key Deliverables:

- **Engineered & Published Library:** Developed and published @abinashswain/node-developer-toolkit on npm, providing standardized API response formatting, operational error handling, structured logging, safe pagination, and declarative schema validation with zero runtime dependencies.
- **Dual ESM & CommonJS Architecture:** Built high-performance dual bundle distribution (.js & .cjs) using tsup and TypeScript 5.7+ with subpath exports enabling tree-shaking and automated .d.ts type generation.
- **Testing & CI/CD Pipelines:** Implemented Vitest automated test suite with **64 test cases (90%+ statement & branch coverage)** and multi-version Node.js (v18, v20, v22) matrix release automation via GitHub Actions.

SCALABLE E-COMMERCE ORDER & PAYMENT PLATFORM

Stack & Architecture: Distributed Backend Microservices • Node.js, Express.js, TypeScript, MariaDB, Redis, RabbitMQ, Docker, NGINX

Responsibilities / Key Deliverables:

- **Microservices & API Versioning:** Architected decoupled microservices (Auth, Catalog, Order, Payment, Inventory, Notification) with strict REST API versioning (v1/v2) and centralized validation middleware.
- **Event-Driven Messaging & Caching:** Designed RabbitMQ messaging with worker queues, acknowledgments (ACK/NACK), and Dead Letter Queues (DLQ); implemented Redis cache-aside caching (cutting DB queries by 70%) and NGINX Layer-7 load balancing under 1,000+ RPM.

EDUCATION

Biju Patnaik University of Technology, Odisha

Bachelor of Technology in Computer Science & Engineering | August 2020 – July 2024

CGPA - 8.00+

ACHIEVEMENTS AND AWARDS

- **Production Healthcare Platform:** Successfully engineered and deployed Swastyam live on Web, Google Play Store, and Apple App Store, serving **10,000+ users**.
- **Open-Source & Commercial Launches:** Published @abinashswain/node-developer-toolkit on npm and deployed JavaTechnocrat (javatechnocrat.in).
- **CI/CD Pipeline Velocity & Latency:** Accelerated release turnaround by **60%** via GitHub Actions CI/CD and improved API latency by **45%**.

CERTIFICATIONS

• **HackerRank - Node.js (Intermediate)** - September 2026 | • **HackerRank - SQL (Advanced)** - January 2024 | • **HackerRank - React (Intermediate)** - January 2024 | • **HackerRank - JavaScript (Basic & Intermediate)** - August 2023
